BASIC-ABSTRACT: NOVELTY - An order receiving computer (3) receives <u>order of article input continuously through internet</u> (7). A modifier (4) <u>changes the price</u> of an article based on the demand for the article. The <u>price provider (5) provides changed price</u> of articles for orderers (8a-8c) through the internet.

USE - For setting price of article using internet.

ADVANTAGE - Maintains supply and demand balance by modifying price of article based on demand condition.

DESCRIPTION OF DRAWING(S) - The figure shows the conceptual diagram of the order receiving system. (Drawing includes non-English language text).
